CFUnited 2007 Preview: Peter Bell on Practical Code Generation by Example

Posted At : June 7, 2007 3:44 PM | Posted By : Christian Ready
Related Categories: podcast, CFLive, MP3 Audio

In this 20-30 minute session, Peter Bell will preview his day-long class which will show how to generate sophisticated custom business applications - quickly, maintainably and extensibly. It doesn't matter whether you are procedural or object oriented - whether you use simple queries or stored procedures, whether you are an intermediate programmer or a guru. If you would like to spend more time solving new problems and less time writing the same old code, his day-long class will change the way you think about your job. Whether you've been generating code for years or are completely new to the concept, you will learn practical techniques and see real world examples that will allow you to significantly improve your skills. He'll preview how in each section we will use practical code examples that you can use in your real world applications while explaining important principles that will allow you to write more powerful, extensible and maintainable code.
