We are sorry for the delay. We should have the video access page up by next week. The videos are in our possession and we are working to upload them to our host.

As most of you know, TeraTech has had the same registration for almost 9 years and we are working to redo the process. It will become easier and faster than previous years. So with all changes and shortage of staff, it has put us behind schedule. Again we apologize for the delay. We guarantee everyone will be very happy with the results.

BONUS! As a thanks for your patience, we are sending all CFUNITED 2006 alumni a full copy of the audio for presentations. This will be mailed along with certificates and information. We will announce on this blog when the packages are to be mailed out.

Thanks again!
