I'm challenging you!

The greatest feedback from 2008 is that attendees want fresh topics.

We want new and creative topics and in depth descriptions. Suggest a topic yourself or suggest a topic for someone else to speak on.

http://callforspeakers.cfconf.org/

The idea is that on December 1st we will put all the topic suggestions together and let the community vote. Everyone will have to vote by December 19th. The person who suggests the topic that is voted the most popular will win a special extra gift or free ticket.

Here's what attendees want at CFUnited (from survey):
Integrating new technologies
Hands-on sessions
CF and Flash Integration
Full life cycle development using many of the open-source tools out there
More Flex sessions
Latest technologies
Discussion topics
Advanced material
Code Samples
Some beginner to intermediate talks on using IDEs for coldfusion
Keep the technical quality and variety high
Enterprise level topics
More Advanced CF sessions
CF/Flex topics
Integrating CF with BlazeDS/AIR/Flex
Report Builder

Continuous Integration, ANT, Subversion, Flex
Why upgrade to CF8 for government employee
Centaur new features
Real world presentations
New keynote
