Announcing a new event for The Online ColdFusion Meetup Group!

What: "Build a scalable architecture with Amazon's EC2", with Adam Howitt

When: Thursday, Nov 15, 12:00pm EST (GMT-5) (What time is that for you? See <http://www.timeanddate.com/worldclock/fixedtime.html?hour=12&min=00&sec=0&p1=25>)

Meeting URL: <http://experts.acrobat.com/cfmeetup/> Duration: Approx. 1 hour

Adam Howitt, presenting a follow-up of his talk from 2 weeks ago. This time he'll present "Build a scalable architecture with Amazon's EC2". Please note that this talk is at noon. I'll also have announcement shortly of another speaker for that evening at 6pm.

Description:

Learn how to use Amazon's EC2 service to build a scaleable architecture with EC2 from just \$75 per month per machine. Adam will show you how to boot up Amazon servers, bundle up a machine image and then boot a farm of identical machines to handle temporary increases in load. Amazon EC2 (elastic compute cloud) is a beta service offered to allow you to boot virtual servers on Amazon's infrastructure to handle surges in traffic or provide extra processing power on demand.
