This year's (Better Late than Never) **State of the CF Union survey** is now [live!](#)

Thanks for participating! It will help us all determine what versions of CFML are most popular today, plus the top frameworks, tools, etc.

The summary results will be available afterwards to everyone who completes the survey, so that you can compare yourself with other CFers.

The survey will help you stay up-to-date on the tools that most developers use, top databases and see get to know more about the project issues you encounter and if other developers have them too.

The final results of the survey will be announced on Friday, April 10, 2015. Thanks for taking the [survey](#) today.
