We've all seen Ajax-powered applications built using Ruby on Rails and other non-CF tools. Have you wondered how to create them using ColdFusion? This presentation will show some basic examples using the latest CF-powered packages for doing so and also include the demonstration of a CFAjax-powered application. We'll also discuss security, usability and cross-browser compatibility concerns. Once we're done, you'll be able to look around at all the Web 2.0 pundits and laugh at how simple it is to emulate their techniques using your favorite programming language: ColdFusion.
