CF Meetup: ANT on the Wire: Using FTP, Email, SVN, and VSS, with Marc Esher

Thursday, February 28, 2008 at 12:00 PM

Meeting URL: <http://experts.acrobat.com/cfmeetup/>

Description: This is a how-to session on using FTP, Email, Subversion, and VSS access in your ANT build files. It will demonstrate exactly how to configure your environment for using these tasks and will demo all of them. I'll show you where to go in the documentation to learn all about these tasks. In addition, I'll show how all of this comes together in the build we use for MXUnit. A small bonus -- using ANT for version numbering -- will sneak in there, too b/c it's so cool.
