Related Categories: topics

Here is the list of accepted topics so far for the Frameworks Track.

"ColdSpring: Better Living through Configuration" - Mark Drew
"ColdSpring 1337" - Chris Scott
"Using Popular JavaScript Frameworks" - Boyan Kostadinov
"Event-Driven Programming in CF" - Sean Corfield
"Leveraging Popular CF Frameworks to Make Better Applications" - Kurt
Wiersma (covers using Mach-II, CS and Transfer together)
"Head First Mach-II" - Matt Woodward
"Driving Fusebox 5.5" - Sandy Clark

Topics on ColdBox, Model-Glue, Transfer, etc. coming soon

By the way, some people have asked about Frameworks Conference. Well, we
haven't found a good time to do one yet or a location. We hoped the turn out last
year would have been better but we were a little disappointed. Maybe for 2009 we
will make some changes and find a fun location. For now, please enjoy the
Frameworks Track at this year's CFUnited. Lots more to come!
