

State of the CF Union survey 2014

Posted At : January 28, 2014 10:30 AM | Posted By : Michael Smith

Related Categories: survey

Help us find out the **State of the CF Union** with this survey - what versions of ColdFusion do people use, what frameworks, tools etc. We will share the summary results and a report on the state of the union with everyone who completes the survey so that you can see how you compare with other CFML developers. That way you can stay ahead of what tools top developers are using today, what databases are hot and see if the project issues you have are common or unique.

Hey perhaps acting on the gap between where you are today and what you see in the survey report will get you that next promotion or new job. Or at the least make your next project more successful. Knowledge is power!

Thanks for your time completing this survey.

We will announce the final results on Tuesday Feb 11th 2014.

Survey Q and A

- Q: Where are the results from previous years' surveys?
- A: CF State of the Union 2013 survey results are [here](#).
- CF State of the Union 2010 survey results are [here](#).
- CF State of Hosting 2010 survey results are [here](#).
