CF Meetup: CFUnited Europe Preview, "Practical Code Generation", with Peter Bell

Thursday, Jan 17, 6:00pm EST

Meeting URL: <http://experts.acrobat.com/cfmeetup/>

Peter Bell, presenting another preview session for the upcoming CFUnited Europe event (<http://europe.cfunitied.com/>) being held March 12-13th in London. These preview talks will be about half the duration of the full hour-long sessions, giving a taste of what the full session would cover. He will be speaking on "Practical Code Generation".

A 20-30 minute preview session of my full session where we'd learn how to generate your applications in a fraction of the time by using the latest techniques proven to reduce application development times - from Software Product Lines to Domain Specific Languages.
