In this practical introduction to object orientation with ColdFusion components, well-known trainer Hal Helms will lead you through the architecting and coding of a project using CFCs. Along the way, we'll cover UML class diagramming, Model-View-Controller applications, and best practices for working with CFCs. If you're unsure of how to use CFCs in your applications -- or simply want to better integrate them into your applications -- this long session will help you.

Audio of presentations given at CFUnited, plus interviews with conference attendees, speakers, and more. Hosted by Christian Ready.
