CF Meetup: XML and ColdFusion, with Nic Tunney

Thursday, March 6, 2008 at 6:00 PM

Meeting URL: http://experts.acrobat.com/cfmeetup/

Description: XML and ColdFusion is an intermediate level presentation delving into not only what XML is and what it means to developers as both a communication tool and persistence layer, but also how to traverse the XML Dom using ColdFusion. If time permits, an XPath demonstration will be given as well. This presentation assumes a basic knowledge of ColdFusion arrays and structures.
