Chris Scott's topic "Introduction to Aspect Oriented Programing with ColdSpring" is now

["Leveraging ColdSpring to build a robust Flex applications"](#)

In this session I will introduce ColdSpring's Remoting Framework and show how it can be leveraged to build robust applications for Flex clients. We will discuss design decisions, such as Service Oriented Architecture and how you can easily build and maintain remote services with ColdSpring. We will also cover some advance topics such as incorporating security and error handling into you applications by taking advantage of the AOP underpinnings of ColdSpring's Remoting Framework. Along the way we will also cover some of the common pitfalls encountered when combining Flex with ColdFusioin
