New class - CF Server Administration for Security and more

Posted At : May 16, 2007 4:30 PM | Posted By : Michael Smith
Related Categories: classes

We have a new pre-conference class for Server admins and developers on how to administer your ColdFusion Server, with an eye toward security.

Learn all the pieces of the CF admin and what settings are critical for security. Plus things you should never do in your code if you want your site to be secure. How to prevent deadlocks, how to control the JVM, Client variables setup and issues and Error handler best practices.
