We have two more BOFs that have been added to the schedule!

CF911: Server Troubleshooting

Host: Charlie Arehart

Date: Friday, July 30, 2010

Time: 5:30 pm to 6:00 pm

Do you have to deal with CF server problems--whether as a developer or an admin, responsible for your own or your organization's server(s)? If so, this is the BOF for you. Led by veteran CF troubleshooter Charlie Arehart, we'll open the floor for knotty challenges you may have faced, or if there's a lull he'll lead a discussion of any of several common (yet frequently perplexing) problems.

ModelBox - Why you need to use open source frameworks and tools

Hosts: Dan Wilson and Luis Majano

Date: Friday, July 30, 2010

Time: 5:30 pm to 6:00 pm

When you build a house, do you cut down your own trees? Why would you do the same when building software? There are millions of open source projects, libraries and tools to help you with application development. In this BoF, Luis and Dan will talk about some very useful open source projects that will help you out a lot.

Be sure to add these BOFs to your schedule!!
