Adobe just announced to me that they are bringing two more individuals from India to present on CF8. We are so excited to give our attendees a first hand experience directly from the core team behind creating this great technology.

"Working with PDF Documents and Forms in ColdFusion 8" by Chandan Kumar

Chandan is part of the core development team of ColdFusion for last two years and has been instrumental in building PDF manipulation features with cfpdf tag, server monitoring, cffeed and looks after several others including cfprint. Currently he is working on adding some very exciting features to ColdFusion language for Centaur. He is a graduate from Indian Institute of Technology.

"Taking advantage of 64-bit support in ColdFusion 8" by Manju Kiran P Pacchhipulusu

With more than 6 years of experience in the Software Industry, I now work as a Lead Software Engineer in the ColdFusion Product team and am the senior-most member of the ColdFusion QE team. I am involved with ColdFusion from its 7.0 release. I have worked on various features of ColdFusion like CFThread, .Net Integration, Exchange Integration, ColdFusion Interfaces, ColdFusion Performance, etc. Before joining Adobe, I worked as Software Design Engineer for Test (SDET) at Microsoft. In Microsoft, I have worked on various teams such as Microsoft Visual Studio, Microsoft Pocket Word and WISP. I blog on ColdFusion at www.manjukiran.net. In my free-time, I get involved in various social activities that promote the betterment of the community.
