

# Sarge Sargent - Building High-performing Applications using Asynchronous Gateways

Posted At : January 9, 2007 6:50 PM | Posted By : Christian Ready

Related Categories: podcast

The introduction of Event Gateways in ColdFusion MX 7 opened many new possibilities for ColdFusion. Until this release, ColdFusion applications operated in a synchronous model, often requiring the user to pay the price while complex application logic executed. In this session we will explore how the use of the asynchronous event gateway can dramatically change the performance characteristics of applications, opening up new design and architectural options for your future applications. Previous experience with ColdFusion is required.
