[CF Underground San Francisco](#) was held last week at the Adobe headquarters in downtown SF as a pre MAX event. We had a sold out event with lots of great attendees and talented speakers. Liz and I had a great time putting the conference together and meeting everyone.

We wanted to thank all of our speakers... Raymond Camden, Joe Rinehart, Jeff Tapper and Dan Wilson for taking their time to present at CF_Underground. Also big thanks to Josh Adams and Adobe for hosting. Oh and we wouldn't have a conference if it weren't for the attendees, so thanks to everyone who came!

Here are a few pictures from the event.

Dan Wilson, on "Practical Refactoring: How Small Improvements Make a Big Difference"

Dan the detective & Liz

Raymond Camden, on "Stuff I wish I knew 10 years ago"
