

Vince Bonfanti - MySpace.com - One Year Later, CFML on the .NET Platform - An Overview

Posted At : March 11, 2007 12:00 AM | Posted By : Christian Ready

Related Categories: podcast

Last year at CFUnited 2005 it was announced that the most heavily trafficked CFML site on the web, MySpace.com, was transitioning to BlueDragon.NET. Today, not only is Myspace running entirely on BlueDragon.NET - but it now trails only Yahoo.com as the most-heavily trafficked of all sites on the internet. Come learn how they serve upwards of 2 billion CFML page views per day leveraging the power of CFML on the .NET framework.
