Josh Adams - Benefits of Deploying CFML on .NET Versus Java/J2EE

Posted At : April 4, 2007 12:00 AM | Posted By : Christian Ready
Related Categories: podcast

Running your CFML on the .NET Framework gives you advantages over the Java /J2EE based form of deployment that you've heard about (and perhaps been using) for some years. This talk will focus on the performance, reliability, and scalability enhancements provided by running CFML, unchanged, on the .NET Framework using BlueDragon for Micrsoft .NET Framework (a.k.a. BlueDragon.NET). Come learn how to take advantage of those enhancements, especially as enabled by Windows Server 2003 and IIS 6 (and the upcoming IIS 7).
