Related Categories: podcast

If your organization is contemplating (or has already started) to move to .NET, or when you see the many advantages in ASP.NET and the .NET Framework, you may desire to better integrate your CFML with the ASP.NET pages and components that your .NET developers are creating. With BlueDragon.NET, the doors to integration are wide open. Come learn how CFML and ASP.NET can share session, application, and request variables, how CFML and ASP.NET pages can include/forward between each other, and more. A CFML page can call a .NET component, and an ASP.NET page can invoke a CFC--both without web services, with components of both types returning native objects that the other page will understand. All this and more will be demonstrated, with plenty of code examples.
