What's in store as you move your CFML to .NET? What amazing possibilities are enabled, both now and into the future as CFML, BlueDragon, .NET, and related Windows components all continue to evolve? In this session, we look at the road ahead and give some insights (and demonstrations) of just some of the many possibilities enabled by the marriage of CFML and .NET. Starting with some cool things you can do today to solve important problems, we'll then move to a sneak peak at some even cooler things coming down the road with .NET and related components including as much on Vista, Atlas, Windows Presentation Foundation, Avalon, Indigo, XMAP, and other new technologies as time and timing will allow.
