

Sean Corfield - Heresy! Embracing Duck Typing in CFCs

Posted At : June 12, 2007 12:00 AM | Posted By : Christian Ready

Related Categories: podcast

The conventional wisdom for working with CFCs is that you should provide returntypes and argument types for methods. This idea stems from working with strongly-typed languages such as Java and C#. What if, though, we accepted ColdFusion as a dynamically-typed language, such as Smalltalk or Ruby? This talk explores the problems "duck typing" solves and the new possibilities it opens.
